

# CareyGlass Solar

## Carey Glass Solar Innovative Energy Solutions

- Cut your energy bills today
- Over 20 years experience in designing and operating solar systems.
- Complete range of energy saving solutions
- Suppliers and installers of vertical wind turbines, photo voltaic panels, solar thermal hot water systems, heat pumps and pellet burners.
- Fully guaranteed Products
- Fully grant certified Products and Fitters.
- Carey Glass Solar - reducing your dependency on depleting natural resources and saving you money.
- We will even complete the grant application on your behalf.

# Save the planet and your pocket with Carey's brilliance

Carey Glass Solar has 20 years experience in designing and operating Solar PV Systems

One of our most recent customers near Hollywood in Co.Down is now enjoying the benefits of the 5.18 k/w photovoltaic system, not only is it producing electricity for use within the home, it's a real energy rating bonus and will increase the market value of the property. The PV system requires no fuel, produces no emissions and generates no waste and shows a true visible statement of this homes

green credentials. For more benefits all of our systems are fitted with a meter which registers unused electricity for sale back to the grid. Photovoltaic (PV) is a very promising solar technology. Pv solar panels transform sunlight directly into electricity and is distinct from other forms of solar energy in that it harnesses the sun's light rather than its heat. It provides an on site renewable power generation for almost any application.

**With very generous grant aid now available for all of our renewable energy technologies, why not give Carey Glass Solar a call and see what we can do for your home to help save you money, while you help save the earth.**
